4. The matter is posted for hearing on 10.07.2024. After perusing the objections/suggestions received in response to this notice, the Hon'ble Commission may notify the date for the public hearing as appropriate.

5. The additional capital cost and Tariffs for the 5th Control Period filed by HNPCL are given below:

<b>Particulars</b>	<b>Cost (Rs Cr)</b>
Prefiltration work (additional capitalization)	30.03
Sea water pipeline work (additional capitalization)	100.00
<b>Total</b>	<b>130.03</b>

#### Prefiltration work

Intake sea water turbidity (consisting of impurities such as mud, sand, silt, aqua culture, etc.) varied from 1.5 to 45 NTU as Desalination system has been designed for 3 NTU. This results in reduced capacity of desalinated water availability and requires Prefiltration system to reduce the turbidity.

#### Sea water pipeline work

During routine inspections, it was found that sub sea pipes have developed leakages. This could be possible due to prolonged shutdown owing to continued litigations during 2018 to 2022, the sub sea pipe at a depth 12 meters have sand ingress and have resulted the damages. The leakages needs to be arrested and damaged pipes are to be replaced.
